

Application No.: 10/076005

Case No.: 57321US002

Amendments to the Specification

Please amend the specification as follows:

On page 10, at line 25, please replace "67provides" with "67 provides" so that the sentence beginning on line 24 reads:

Material 67 provides an etch stop for the ablation process which can avoid air entrapment under the web of polymer film 66.

On page 15, at line 14, please replace "ares" with "areas" so that the sentence beginning on line 13 reads:

Also, the aperture mask web, the deposition substrate web, or both may include distortion minimizing features, such as perforations, reduced thickness areas, slits, or similar features, which facilitate more uniform stretching.
